

We can help. Together. Today.

Nepal's earthquake this past spring destroyed or damaged nearly 900,000 dwellings. With winter coming soon, we need to get families back into real houses, not tents or makeshift shelters.

More than eight million people – one-fourth of Nepal's population – were affected by the earthquake there. UCC Disaster Ministries has set a goal of building 50 earthquake resistant homes for families who have lost everything. For every family we're able to get back into a safe, sustainable home, the better they'll be able to support their local community.

UCC Disaster Ministries has provided \$140,000 for immediate response efforts and long-term recovery and reconstruction. "Long-term recovery and rehabilitation work are often the most expensive and least funded," says UCC Disaster Ministries Executive Zach Wolgemuth. "The UCC is preparing for a long recovery and continued engagement in the relief effort, ready to fill the gaps where needed."

For more about the UCC's relief efforts and to donate with a credit card, see our website: ucc.org/disaster_nepal_earthquake. Or return the below with your check today. Thank you!
