

REGISTRAR INSTRUCTIONS

Across the United Church of Christ, Committees on Ministry provide a ministry of discernment and oversight, support and accountability, with all those who hold status or standing in the UCC. The Spirit-filled work that Committees on Ministry conduct is supported by critical administrative work: *handling correspondence, administering paper files, and updating data in the UCC Data Hub.*

The person assigned by a COM to tasks of correspondence and filing is commonly considered the Registrar. Updating the UCC Data Hub is commonly the job of a Data Manager on the staff of a conference or association. Those who manage the Committee's correspondence and who maintain files should communicate closely with the conference (or association) Data Manager. Conferences in turn communicate closely with the denomination's Ministerial Excellence, Support and Authorization (MESA) Team.

The following tables are designed to summarize standard Registrar procedures, with reference to the actions of a Data Manager as well. The tables follow the structure of the *Manual on Ministry: Section 2:*

- Discernment with UCC Members in Discernment
- Discernment with Ecumenically Ordained Ministers
- Ministerial Standing for Clergy
- Ministerial Standing for Laity
- Covenants and Endorsements
- Accountability and Support

Useful definitions for understanding the tables:

- A **letter** is any written communication that can be filed, whether formal letter, email communication, or completed form. Most letters are appropriately written by a Committee on Ministry chair or member.
- A **record** in the UCC Data Hub tracks any person who holds ministerial standing (relationship of accountability) or has status (formal relationship pending discernment) with the United Church of Christ.
- When the UCC Data Hub shows that a record is **inactive**, this means that a particular person was discontinued from standing or status and that no UCC conference currently stewards the record. The last conference listed would have historical information about the individual whose record is marked "inactive."
